ABOUT THE HASKINS SOCIETY

The society's name commemorates and honors one of the United States' most eminent medieval historians, Charles Homer Haskins (1870-1937). A major influence in American graduate education, he taught many fine students, some of whom taught senior members of the society. His work on the twelfth-century renaissance, medieval science, and the rise of the university was seminal, and he effectively pioneered the study of medieval culture as an autonomous field. The Haskins Society is dedicated to the promotion of his many and varied interests.
